

## About Access Pack

AccessPack, an advanced access control system designed for all electrically powered machinery, from cranes to forklifts. Using smart card technology, Access Pack ensures that only certified and authorised operators can activate equipment, boosting workplace safety and accountability.

Access pack offers complete piece of mind to any health and safety officer, maintenance or production manager by ensuring that any piece of machinery will only start if the user has authority, is sufficiently trained, equipment certification is in date and all pre use checks have been carried out.

Unlike other access card systems, Access pack can be fitted to all machines and can beam activity data back to the Crane Of The Future portal. The Access Pack drives health and safety culture and boosts production by giving full visibility and traceability of operations by logging operator and production data for machinery, individuals, shifts and teams.

## How It Works

- Operators scans their access pack cards against the fob mounted on the equipment control.
- Access Pack instantly assesses if the operator and equipment documentation is in place
- Any programmed pre use checks must be carried out prior to start which are logged on the portal.
- If no issues are found, the equipment and user are enabled, starting the equipment.
- Alerts sent for any unauthorised usage attempt, pre use faults and upcoming certification expiry.

## Key Features

### SMART CARD ACCESS CONTROL

Restricts equipment use to authorised, certified operators only

### CERTIFICATION & COMPLIANCE VERIFICATION

Blocks operation if the user's certification is expired

### PRE USE SAFETY CHECK REQUIREMENT

Ensures operators complete safety inspections before use

### EASY EQUIPMENT INTEGRATION

Can be installed on any electrically powered equipment including overhead cranes, forklifts

### ONE-CARD MULTI EQUIPMENT ACCESS

A single access card for all electrical machinery, regardless of type or manufacturer

### REAL TIME USAGE TRACKING

Records who used the equipment, when, and for how long, providing full record

## Benefits

**PREVENTS UNAUTHORISED EQUIPMENT USE**

**ENHANCES WORKPLACE SAFETY CULTURE THROUGH COMPLETE VISIBILITY**

**REDUCES EQUIPMENT MISUSE & DOWNTIME**

**SIMPLIFIES CERTIFICATION MANAGEMENT**

**PROVIDES DETAILED REPORTS & ANALYTICS**

**ALERTS FOR SAFETY & MAINTENANCE**
