

About MaxOut

Overhead cranes must be fitted with an overload protection device as per BS-7121.

MaxOut is an affordable, easy-to-install electronic load limiter that ensures safety and compliance without the hassle.

In addition to performing its load limiting function, MaxOut is a HoistNet compatible device that can act as a wireless source of load data for displays, data loggers, load summation units etc.

How It Works

- MaxOut is mounted on the crane and connected to the hoist control system.
- Calibration – Using wireless Bluetooth configuration, set the required load limit.
- Real-Time Protection – When the crane approaches or exceeds the limit, MaxOut automatically prevents further lifting.
- Data Transmission – If connected via HoistNet, MaxOut sends load data to compatible displays and logging systems for monitoring and analysis.

Key Features

ACCURATE LOAD LIMITING

Prevents Crane Overloads for Enhanced Safety and Compliance

WIDE VOLTAGE COMPATIBILITY

Operates on 24 - 240 VAC making it adaptable to various setups.

WIRELESS CONFIGURATION

Wireless connection enabled for quick and hassle-free setup and calibration

HOISTNET COMPATIBILITY

Seamlessly integrates with HoistNet-enabled devices, such as load displays, data loggers, and summation units

OEM CRANE CONTROL COMPATIBILITY

Works with all overhead crane control systems regardless of age and manufacturer.

Benefits

ENSURE SAFETY & COMPLIANCE

Meets BS-7121 regulations for overhead crane overload protection.

QUICK & EASY INSTALLATION

No complex setup required; install and calibrate in minutes

REDUCES EQUIPMENT DOWNTIME

Full crane activity logs provide clear insights for safety & operation audits

ENHANCES OPERATIONAL EFFICIENCY

Provides real-time load data for better crane management.

SEAMLESS INTEGRATION

Works with existing crane control systems without modification.

CRANE OF THE FUTURE

Max Out is a product in the Crane of the Future range.

The Crane of the Future is an innovative, cost effective range of smart technology which can be fitted to any overhead crane.

CRANE OF THE FUTURE...

Intelligence made simple
